

## Security Measures and Privileged Access Management with iDoperation

### Crown Jewels Access Management: Minimizing Risks of IT Critical Infrastructure 2025

 Wednesday 28th May 2025

 13:00 - 16:30

 Grande Centre Point Terminal 21 Hotel, Floor C Room Sukhumvit

Free Entry

Scan QR Code to register

We are introducing a Privileged Access Management (PAM) solution for the Thai market. In addition to measures against external cyber attacks, we propose effective methods to strengthen privilege management and monitoring to maintain employee awareness and ethics.

By implementing a Security Behavior and Culture Program (SBCP) through rule-based operations, we support the enhancement of safety and effectiveness while achieving operational efficiency and workforce optimization.

\*The primary language of the presentation is Thai and English. Japanese support will be available.

#### Agenda :

- 13:00 - 13:30 Registration and Networking
- 13:30 - 14:00 Welcome & Opening
- 14:00 - 15:00 Why Human-Centric Approach to Cybersecurity is Important
